Autobid.de – the auction platform for used cars

With its Autobid.de brand, Auktion & Markt AG is one of the largest and most successful auction providers for the commercial vehicle trade in Europe.

We have been active in the auction business for over 35 years, constantly coming up with new ideas. Every day, used vehicles from car dealerships, manufacturers, brand-affiliated branches, banks, hire and fleet companies are marketed to vehicle dealers throughout Europe.

Dealers from all over Europe have been relying on our efficiency for many years. We bring up to 1,500 vehicles from top suppliers under the hammer every day.

Beyond location: Your one-stop solution for all your needs.

With our extensive network of 17 locations across Germany, Autobid.de is your reliable partner, offering not only personalized service but also logistical advantages. Benefit from shorter distances and faster processing, regardless of your international location.

Every vehicle you find with us is recorded and documented by our own team in accordance with Autobid.de's high quality standards. This is the only way you can make an informed purchase decision.

Autobid.de is one of the online pioneers in professional used car trading.

As early as 2003, vehicles previously auctioned exclusively live were also made available online. Since then, Autobid.de has established itself as one of the most successful B2B platforms in Europe. Our users benefit not only from numerous supportive features but also from the streamlined, transparent, and secure auction process.

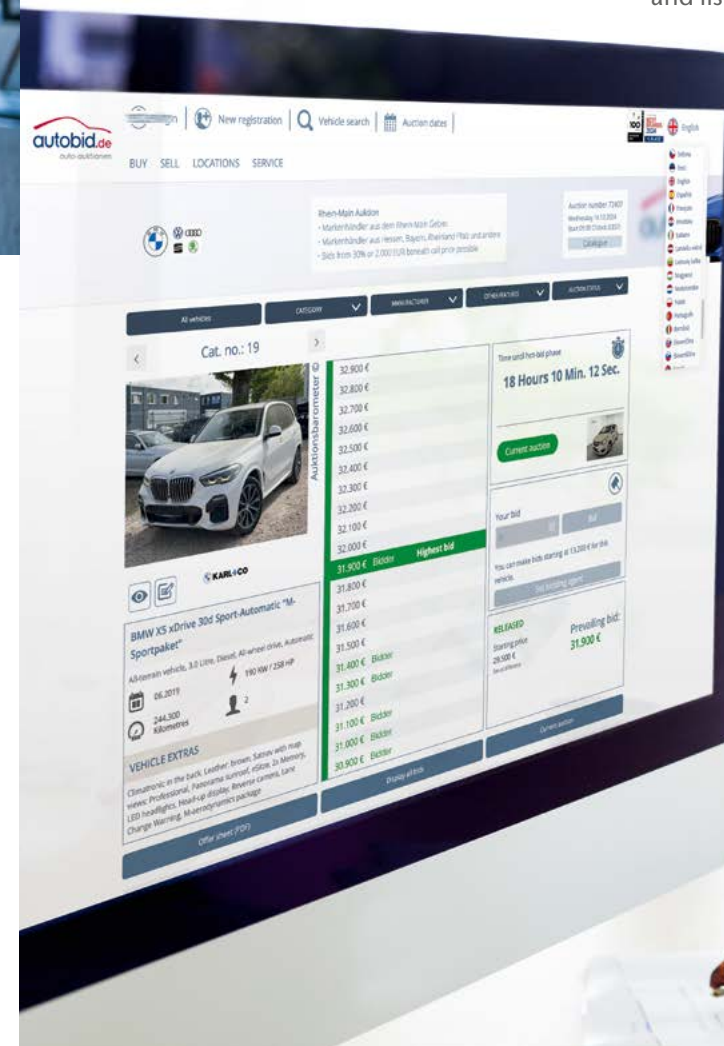

Car trade goes online here

With our internationally orientated auction platform www.autobid.de, we offer you a highly professional online procurement channel for

supplementing your vehicle stock – currently in 22 languages.

All vehicles are inspected by Autobid.de employees throughout Europe and listed online. Numerous photos document the exact condition of the vehicle

and the auction process itself is extremely simple. Dealers bid on their desired vehicle in real time or use the automatic bidding agent. The auction barometer shows the current bidding status at a glance. Registration to take part in the auctions is free of charge for vehicle dealers from Germany and non-EU countries.

One portal. Many advantages.

- One of the largest B2B online auction platforms in Europe
- Access to a wide range of used vehicles
- All vehicle types, all brands and all models
- Greencars – all electric vehicles on one page
