4 Your bid

Once you have found your preferred vehicle, there are three alternatives for you to participate in the bidding process.

1. Arbitrary bid:

Enter your price in the bid field.

2. Bidding steps:

Raise the current bid in steps of € 100, € 200 or € 500.

3. Run agent:

Are you unable to follow the auction activity in person for the vehicle you are interested in? Your bidding agent can do the work for you.

Under “Set bidding agent” enter the maximum amount you want to spend for the specific vehicle. The agent will then bid higher than other bidders’ bids, but only raise the bid by the minimum increase amount of € 100. This will continue until you are either the highest bidder when the auction ends, or until your preset maximum bid has been reached, and other bidders have bid higher than this amount. However, at any time you have the option of raising the maximum bid of a bidding agent which has already been set.

Please note: Each bid must be rounded up to the nearest 100 Euros. The minimum step by which a price must be entered is also 100 Euros. Prices must be entered without commas, decimal points or Euro signs.

5 Subject to reservation

It is possible to make the first bid under the starting price. Any possible difference from the starting price will be indicated in the auction. After the knockdown, should your bid still lie under the starting price, 72 hours after the auction at the latest you will receive notice by email whether or not your bid subject to a reservation is cleared for sale or not.

6 Bid history

As a logged-in user, you are able to list all submitted bids including price, day and time.
